About the FMT Zajecar d.o.o

Measuring Transformers Factory (FMT) was established in 1969 in Zajecar. From its inception to the present day FMT Zajecar has been present on the domestic and foreign markets for electrical equipment.

The company specializes in the production of instrument transformers of low and medium voltages and insulators of voltages up to 36kV. End users of our products, one way or another, are electrical distribution companies.

FMT Zajecar has all the appropriate certifications which ensure all regulations, standards and procedures are followed during the manufacturing process ensuring the high quality products which is our imperative.

Products of FMT Zajecar have become known as reference name for high quality products, as evidenced by our satisfied customers with whom we cooperate longer than 40 years.

FMT Zajecar has fulfilled all requirements of ISO standards and is ISO9001, ISO14000, ISO18000, ISO17020 and ISO2700 accredited which also guarantees high quality of the factory's operations.

In addition to standard production, FMT Zajecar owns controlling body "FMT-Control", which is the only accredited third party certification laboratory in the country, for this field, accredited by the ATS and in regulations to ISO / IEC 7020.

For years we have patiently built our partnership with both business partners and the customers which, together with the wide range of products of high quality and constant improvements, has enabled us to constantly enter new soils, gain new customers and expand our business horizons.

Today, FMT Zajecar also possesses an international representative office in the country's capital of Belgrade. We have been in the game for more than 45 years, period during which we have gained a lot of experience and have manufactured over 3 million units for customers all over the globe.

We participate in many regional fairs as exhibitors and strive to accomplish new business cooperation with regional companies and companies world-wide.

Company's Vision

Company's vision is to keep the obtained reference name of the manufacturer of quality transformers and insulators, as well as to maintain its leading position in professional solutions for low-voltage and medium voltage instrument transformers and insulators, both on the domestic and foreign market.

Company's Mission

Mission company FMT Zajecar is providing top quality services and most comfortable solutions for instrument transformers and provide the optimal response to the needs of our clients. As part of our mission we strive for the realization of greater value to customers, with the continuous professional and personal growth of our staff, constant improvement of the organization and implementation of quality management principles.

Core Values

- **Trust and respect**

We tend to achieve and keep mutual respect and trust among our partners and customers alike as the main basis for the business relationship we strive for. In order to achieve our vision, we respect the integrity and performance of each individual, because they are equally important to every product and every service and we strive to be the mainstay of our business partners and customers.

- **Focus on customers and partners**

Focus on customers and partners is accomplished by our proactive approach to work, including the anticipation of customer needs, as well as the information we provide before it has even been requested. In this way we develop healthy business co-operation and we endeavor to earn confidence in the FMT Zajecar. To achieve this, we constantly monitor the latest trends in today's increasingly demanding market, and in accordance with the needs and changes of the market, we approach our clients, early trying to convince them that FMT Zajecar should be their first option of choice.

- **Responsible, open and honest behavior**

Business is based on open and honest two-way communication. All promises, both to partners and to our customers, we fulfill as previously agreed on and within the agreed time frame.

- **Our stuff**

Experience and traditions that bind to FMT Zajecar are priceless. More than 200 people, top experts in their field of their profession, choose to work for FMT Zajecar. Together with them, FMT Zajecar has been growing for the last 45 years and has been operating in accordance with the rules of business procedures and ethnic behaviors. We understand that each of us is responsible individually for ourselves and our work, but also for the success and overall well-being of the entire company. Providing the personal maximum and constantly rising the expectations bar, we find the best possible technical solution to the satisfaction of all parties involved. More than 70,000 units are annually manufactured by FMT Zajecar, with the tendency to increase in quantity the following years. Without any doubts, this is the result of great teamwork and professionalism FMT Zajecar insists on.

- **Innovation**

Without innovation there is no progress. We believe that innovative thinking is essential to any sort of progress and in achieving better, more effective and more efficient products.

Following the latest trends and technologies in our business, we strive to find new, modern and better ways to meet our customers expectations, their technical requirements, as well as all the other possible requirements.
